

FOR IMMEDIATE RELEASE:

## BTL SecureClient Passes Independent Testing

**Shipley, United Kingdom, February 2010**

BTL Group Ltd, the leading UK based provider of e-Assessment solutions, is pleased to report that their SecureClient software has passed rigorous independent testing. The test performed was the Microsoft Platform Test for ISV Solutions on VeriTest®.

The SecureClient is a program that 'locks down' the candidate's desktop when sitting an e-Assessment. This prevents the candidate from accessing any applications or features other than those provided for the e-Assessment. Certain keystrokes are also blocked for security reasons, such as: print screen; Alt + F4, Alt + Tab; Windows key, etc. Additional security and resilience measures are also incorporated into the SecureClient to ensure there is no single point of failure when delivering high stakes assessments however rich and innovative the content may be.

BTL rigorously tests every part of its Surpass e-Assessment platform before any final release to their customers. As Microsoft partners, BTL has specifically had the SecureClient application tested by a Microsoft certified independent testing partner (Lionbridge). This test is required in order to maintain BTL's status of being a Microsoft Certified Independent Software Vendor.

Andy McAnulla, Senior Solutions Architect, states, "The SecureClient is installed across thousands of exam centre computers and so it is critical for us to ensure that we employ independent Microsoft testing as part of our quality assurance process."

### About BTL

BTL is a leading UK owned e-Assessment development and delivery company. With over 1 million certified exams powered by BTL, our content development and delivery tools are helping some of the UK's largest agencies face the challenge of on-screen delivery.

Since 1985, we have been successfully helping our customers exceed their assessment and learning expectations.
